

1993 EDITORIAL INDEX

Technical articles by author and subject

AUTHOR

Amberger, Ronald F.

1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; with John A. DeFrees, April p.24

Arens, Edward A.

Air movement, comfort and ventilation in partitioned work stations; with Fred S. Bauman, Randall S. Helm, David Faulkner and William J. Fisk; March p.42

Air movement and thermal comfort; with Marc E. Fountain; August p.26

Armstrong, Richard S.

HVAC design considerations for cold climates; September p.22

Austin, Stephen B.

Chilled water system optimization; July p.50

Aumann, Donald J.

Calculating lighting and HVAC interactions; with Robert A. Rundquist and Karl F. Johnson; November p.28

Avery, Gil

Designing and commissioning variable flow hydronic systems; July p.46

Bauman, Fred S.

Air movement, comfort and ventilation in partitioned work stations; with Randall S. Helm, David Faulkner, Edward A. Arens and William J. Fisk; March p.42

Becker, Bryan R.

Drift eliminators and cooling tower performance; with Larry F. Burdick; June p.28

Besant, Robert W.

1993 HVAC&R Technology Review; Energy efficiency and future HVAC designs; January p.S228

Blazier, Warren E., Jr.

Avoiding low frequency noise in packaged HVAC equipment; with Charles E. Ebbing; June p.46

Bloom, Barry

Matching equipment size to the cooling load; October p.50

Bohac, David L.

Measuring seasonal efficiency of space heating boilers; with Russell W. Landry, Douglas E. Maddox and Mary S. Lobenstein; September p.38

Boldt, Jeffrey G.

1993 Technology Awards; Separate HVAC systems maximize energy efficiency; April p.16

Brambley, Michael R.

Building operation: Opportunities for improvement?; with J. Steven Schliesing, Patrick J. O'Neill and Mark A. Halverson; November p.38

Bronson, J.D.

Graphical tools to help calibrate the DOE-2 simulation program; with J.S. Haberl, S.B. Hinchey and D.L. O'Neil; January p.27

Buck, William J.

1993 HVAC&R Technology Review; Refrigeration industry due for traumatic changes; January p.S228

Burdick, Larry F.

Drift eliminators and cooling tower performance; with Bryan R. Becker; June p.28

Burdick, Robert S.

1993 HVAC&R Technology Review; The re-emergence of ammonia refrigeration; January p.S229

Burgett, Lee W.

Revised standards for mechanical refrigeration; August p.31

Calm, James M.

Status and use of the Refrigerant Database; November p.50

Champagne, David

Building commissioning with DDC systems; December p.20

Cheung, M.S.

Changes in air leakage levels of six Canadian office buildings; with C.Y. Shaw and J.T. Reardon; February p.34

Corr, S.

Retrofitting large refrigeration systems with R-134a; with Thomas W. Dekleva and A.L. Savage; February p.29

Crawford, James G.

R-123: A balanced selection for low pressure systems; with Eugene L. Smithart; May p.66

Culp, Charles H.

Silicon infrared sensors for thermal comfort and control; with Brian C. Krafthefer, Michael L. Rhodes and Marilyn A. Listvan; April p.38

Dani, Sashikant F.

1993 Technology Awards; Bank operations center benefits from constant air ventilation system; March p.24

DeFrees, John A.

1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; with Ronald F. Amberger; April p.24

Dekleva, Thomas W.

Retrofitting large refrigeration systems with R-134a; with S. Corr and A.L. Savage; February p.29

Flammability and reactivity of select HFCs and mixtures; with Andrew A. Lindley and Philip Powell; December p.40

Demke, Randall

Current and future refrigerants for chillers; with Stephen Massien; May p.62

Dietrich, William E.

A positive outlook for the future; May p.64

Dillon, Michael E.

1993 HVAC&R Technology Review; The future of the HVAC&R industry; January p.S229

Dodge, Terence M.

Ventilating the English Channel Tunnel; October p.70

Doerr, Robert

Compatibility of refrigerants and lubricants with motor materials; with Stephen Kujak; August p.42

DuBose, George H.

Why HVAC commissioning procedures do not work in humid climates; with J. David Odom and Phillip W. Fairey; December p.25

Ebbing, Charles E.

Avoiding low frequency noise in packaged HVAC equipment; with Warren E. Blazier Jr.; June p.46

Elovitz, David M.

Understanding smoke management and control; with Kenneth M. Elovitz; April p.34

Elovitz, Kenneth M.

Understanding smoke management and control; with David M. Elovitz; April p.34

Evans, Richard A.

1993 HVAC&R Technology Review; Energy conservation opportunities still exist; January p.S229

Fairey, Phillip W.

Why HVAC commissioning procedures do not work in humid climates; with George H. DuBose and J. David Odom; December p.25

Farmwald, Jay A.

Using passive refrigeration to stabilize foundations in cold climates; with Edward Yarmak Jr.; September p.32

Faulkner, David

Air movement, comfort and ventilation in partitioned work stations; with Fred S. Bauman, Randall S. Helm, Edward A. Arens and William J. Fisk; March p.42

Feldman, K. Thomas, Jr.

Advanced insulations for refrigerated shipping containers; February p.42

Filardo, Michael J., Jr.

Outdoor air: How much is enough?; January p.34

Florino, Donald P.

1993 Technology Awards; Chilled water storage system reduces energy costs; April p.30
Energy conservation with chilled-water storage; May p.22

Fisk, William J.

Air movement, comfort and ventilation in partitioned work stations; with Fred S. Bauman, Randall S. Helm, David Faulkner and Edward A. Arens; March p.42

Fountain, Marc E.

Air movement and thermal comfort; with Edward A. Arens; August p.26

Gabriel, Gary R.

1993 Technology Awards: System retrofit provides decentralized heating for mental health facility; March p.33

Galway, J. Michael

Renovation of the Watergate 600 Building; with Hsing-Chung Yu and John J. Harmon; October p.30

Gibson, Gerald L.

Electric demand prediction using artificial neural network technology; with Timothy T. Kraft; March p.60

Goodburn, Ned W.

New HVAC system blends past and present in historic Ohio Statehouse; with Terence J. Sullivan; October p.22

Guinn, Gerald R.

1993 HVAC&R Technology Review; HVAC&R technologies of the future; January p.S230

Haberl, J.S.

Graphical tools to help calibrate the DOE-2 simulation program; with J.D. Bronson, S.B. Hinchey and D.L. O'Neil; January p.27

Haider, S. Imam

Tube-side fouling in water chiller-flooded evaporators; with Ralph L. Webb and Amanda K. Meitz; October p.59

Halverson, Mark A.

Building operation: Opportunities for improvement?; with J. Steven Schliesing, Patrick J. O'Neill and Michael R. Brambley; November p.38

Hamed, Gary R.

Compatibility of elastomers with refrigerant/lubricant mixtures; with Robert H. Seiple; August p.173

Harmon, John J.

Cold air distribution and concerns about condensation; with Hsing-Chung Yu; May p.34
Renovation of the Watergate 600 Building; with Hsing-Chung Yu and J. Michael Galway; October p.30

Harold, Robert G.

Achieving a quiet rooftop installation; December p.32

Helm, Randall S.

Air movement, comfort and ventilation in partitioned work stations; with Fred S. Bauman, William J. Fisk, David Faulkner and Edward A. Arens; March p.42

Hinchey, S.B.

Graphical tools to help calibrate the DOE-2 simulation program; with J.S. Haberl, J.D. Bronson and D.L. O'Neil; January p.27

Holte, Donald E.

1993 HVAC&R Technology Review; All building systems must be fully integrated; January p.S232

Hopper, Robert E.

1993 HVAC&R Technology Review; Innovations in the HVAC industry; January p.S230

Hunton, Richard O.

1993 HVAC&R Technology Review; The CFC crisis: Our opportunities; January p.S232

Jackins, George A.

1993 HVAC&R Technology Review; Using what we have better; January p.S232

Jensen, Robert E.

1993 HVAC&R Technology Review; Nuclear HVAC is here to stay; January p.S234

Johnson, Karl F.

Calculating lighting and HVAC interactions; with Robert A. Rundquist and Donald J. Aumann; November p.28

Kadaba, Prasanna V.

1993 HVAC&R Technology Review; New technologies will promote energy efficiency; January p.S234

Katrakis, John T.

How to measure low-pressure steam boiler efficiency; with Thomas S. Zawacki; September p.46

Kelly, Thomas J.

Testing of chemically treated adsorbent air purifiers; with Devon A. Kinkead; July p.14

Kinkead, Devon A.

Testing of chemically treated adsorbent air purifiers; with Thomas J. Kelly; July p.14

Klote, John H.

1993 HVAC&R Technology Review; Smoke control and ASHRAE; January p.S234

Kraft, Timothy T.

Electric demand prediction using artificial neural network technology; with Gerald L. Gibson; March p.60

Krafthefer, Brian C.

Silicon infrared sensors for thermal comfort and control; with Charles H. Culp, Michael L. Rhodes and Marilyn A. Listvan; April p.38

Kujak, Stephen

Compatibility of refrigerants and lubricants with motor materials; with Robert Doerr; August p.42

Lacey, D. Randall

Selecting mechanical systems for laboratory buildings; November p.44

Landry, Russell W.

Measuring seasonal efficiency of space heating boilers; with Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38

Lefebvre, Ronald R.

1993 Technology Awards; New HVAC system reduces operating costs; April p.20

Lindley, Andrew A.

Flammability and reactivity of select HFCs and mixtures; with Thomas Dekleva and Philip Powell; December p.40

Listvan, Marilyn A.

Silicon infrared sensors for thermal comfort and control; with Charles H. Culp, Brian C. Krafthefer and Michael L. Rhodes; April p.38

Lizardos, Evans J.

1993 Technology Awards; Hospital's new energy center cuts costs and conserves energy; March p.37

Lobenstein, Mary S.

Measuring seasonal efficiency of space heating boilers; with Russell W. Landry, Douglas E. Maddox and David L. Bohac; September p.38

McCabe, Francis J.

Fire and smoke dampers in active HVAC systems; with Richard M. Plettner; June p.20

McCluney, W. Ross

The benefits of using window shades; with Laney R. Mills; November p.20

Madan, Chandra

R-134a: The best alternative for chillers; May p.58

Maddox, Douglas E.

Measuring seasonal efficiency of space heating boilers; with Russell W. Landry, Mary S. Lobenstein and David L. Bohac; September p.38

Manning, Billy R.

1993 HVAC&R Technology Review; Issues and opportunities for the future; January p.S235

Massien, Stephen

Current and future refrigerants for chillers; with Randall Demke; May p.62

Meier, Alan K.

Field performance of residential refrigerators; August p.36

Meitz, Amanda K.

Tube-side fouling in water chiller-flooded evaporators; with S. Imam Haider and Ralph L. Webb; October p.59

Mills, Laney R.

The benefits of using window shades; with W. Ross McCluney; November p.20

Murray, J.G.

Purge needs in absorption chillers; October p.40

Nagengast, Bernard A.

The 1920s: The first realization of public air conditioning; January p.S49

Ng, A.S.

R-245ca: A potential far-term alternative for R-11; with N.D. Smith, K. Ratanaphruks and M.W. Tufts; February p.19

Norford, Leslie K.

Integrating VAV zone requirements with supply fan operation; with Mashuri Warren; April p.43

Nugent, Barry

Primary cooling systems: A comparative analysis; with Laurence V. Wilson; January p.19

Odom, J. David

Why HVAC commissioning procedures do not work in humid climates; with George H. DuBose and Phillip W. Fahey; December p.25

Olesen, Bjarne W.

Standards for design and evaluation of the

thermal indoor environment; August p.20

O'Neil, D.L.

Graphical tools to help calibrate the DOE-2 simulation program; with J.S. Haberl, J.D. Bronson and S.B. Hinchey; January p.27

O'Neill, Patrick J.

Building operation: Opportunities for improvement?; with J. Steven Schliesing, Mark A. Halverson and Michael R. Brambley; November p.38

Ostman, John P.

Environmental solutions for today's refrigerant challenges; May p.70

Ottney, Thomas C.

Particle management for HVAC systems; July p.26
Helping users with a universal air filter classification system; September p.56

Parsnow, James R.

The long-term alternative: R-143a in positive pressure chillers; May p.54

Patterson, Neil R.

ASHRAE: The Bridge to Professional Growth; August p.17

Pekkinen, Jorma S.

Thermal comfort and ventilation effectiveness in commercial kitchens; July p.35

Persily, Andrew K.

Ventilation, carbon dioxide and ASHRAE Standard 62-1989; July p.40

Plettner, Richard M.

Fire and smoke dampers in active HVAC systems; with Francis J. McCabe; June p.20

Powc, I., Philip

Flammability and reactivity of select HFCs and mixtures; with Thomas Dekleva and Andrew A. Lindley; December p.40

Ratanaphruks, K.

R-245ca: A potential far-term alternative for R-11; with N.D. Smith, M.W. Tufts and A.S. Ng; February p.19

Reardon, J.T.

Changes in air leakage levels of six Canadian office buildings; with C.Y. Shaw and M.S. Cheung; February p.34

Rengholt, Ulf N.

1993 HVAC&R Technology Review; Sick buildings: A gift from heaven?; January p.S236

Rhodes, Michael L.

Silicon infrared sensors for thermal comfort and control; with Charles H. Culp, Brian C. Krafthefer and Marilyn A. Listvan; April p.38

Rivers, Richard D.

1993 HVAC&R Technology Review; Gas filtration: Progress and problems; January p.S236

Rundquist, Robert A.

Calculating lighting and HVAC interactions; with Karl F. Johnson and Donald J. Aumann; November p.28

Savage, A.L.

Retrofitting large refrigeration systems with R-134a; with S. Corr and Thomas W. Dekleva; February p.29

Schaffer, Mark E.

Controlling HVAC system noise and vibration; June p.39

Schliesing, J. Steven

Building operation: Opportunities for improvement?; with Patrick J. O'Neill, Mark A. Halverson and Michael R. Brambley; November p.38

Scofield, C. Mike

Low temperature air with high IAQ for tropical climates; March p.52

Schmidt, William A.

Fire dampers: Obsolete or still a good bet?; June p.16

Seiple, Robert H.

Compatibility of elastomers with refrigerant/lubricant mixtures; with Gary R. Hamed; August p.173

Shaw, C.Y.

Changes in air leakage levels of six Canadian office buildings; with J.T. Reardon and M.S. Cheung; February p.34

Shiflett, Mark B.

Near-azeotropic refrigerants as alternatives for R-502; with Akimichi Yokozeki; February p.24

Smith, N.D.

R-245ca: A potential far-term alternative for R-11; with K. Ratanaphruks, M.W. Tufts and A.S. Ng; February p.19

Smith, Scott F.

1993 Technology Awards: Thermal storage HVAC system retrofit provides economical air conditioning; March p.28

Smithart, Eugene L.

R-123: A balanced selection for low pressure systems; with James G. Crawford; May p.66

Spatz, Mark W.

Alternative refrigerants for R-22 chillers; May p.50

Suggs, Robert M.

1993 HVAC&R Technology Review; The changing role of HVAC&R engineers; January p.S236

Sullivan, Terence J.

New HVAC system blends past and present in historic Ohio Statehouse; with Ned W. Goodburn; October p.22

Taylor, Robert E.

1993 HVAC&R Technology Review; The great smoke/fire control challenge; January p.S237

Treleash, Stephen W.

1993 HVAC&R Technology Review; GSHPs offer several benefits; January p.S238

Tufts, M.W.

R-245ca: A potential far-term alternative for R-11; with N.D. Smith, K. Ratanaphrucks and A.S. Ng; February p.19

Walkinshaw, Douglas S.

1193 Technology Awards: Indoor air quality and the ASHRAE Technology Awards; March p.22

Warren, Mashuri

Integrating VAV zone requirements with supply fan operation; with Leslie K. Norford; April p.43

Webb, Ralph L.

Tube-side fouling in water chiller-flooded evaporators; with S. Imam Haider and Amanda K. Meitz; October p.59

Wilson, Laurence V.

Primary cooling systems: A comparative analysis; with Barry Nugent; January p.19

Yarmak, Edward, Jr.

Using passive refrigeration to stabilize foundations in cold climates; with Jay A. Farmwald; September p.32

Yokozeki, Akimichi

Near-azeotropic refrigerants as alternatives for R-502; with Mark B. Shiflett; February p.24

Yu, Hsing-Chung

Cold air distribution and concerns about condensation; with John J. Harmon; May p.34

Renovation of the Watergate 600 Building; with John J. Harmon and J. Michael Galway; October p.30

Zahn, Willard R.

1993 HVAC&R Technology Review; What makes a good engineer?; January p.S238

Zawacki, Thomas S.

How to measure low-pressure steam boiler efficiency; with John T. Katrakakis; September p.46

Zhang, Z. John

Another look at traditional control valve sizing practice; February p.38

SUBJECT

Adsorption

Testing of chemically treated adsorbent air purifiers; Thomas J. Kelly and Devon H. Kinkead; July p.14

Air Cooling

Primary cooling systems: A comparative analysis; Laurence V. Wilson and Barry Nugent; January p.19
The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49

Air Conditioning

The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49
1993 HVAC&R Technology Review; Nuclear HVAC is here to stay; Robert E. Jensen; January p.S234
1993 Technology Awards; Thermal storage HVAC system retrofit provides economical air conditioning; Scott F. Smith; March p.28
1993 Technology Awards; Separate HVAC systems maximize energy efficiency; Jeffrey G. Boldt; April p.16
Calculating lighting and HVAC interactions; Robert A. Rundquist, Karl F. Johnson, and Donald J. Aumann; November p.28
Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fahey; December p.25

Air Distribution

The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49
Integrating VAV zone requirements with supply fan operation; Mashuri Warren and Leslie K. Norford; April p.43
Cold air distribution and concerns about condensation; John J. Harmon and Hsing-Chung Yu; May p.34
Renovation of the Watergate 600 Building; Hsing-Chung Yu, John J. Harmon and J. Michael Galway; October p.30

Air Filter

Particle management for HVAC systems; Thomas C. Ottney; July p.26
Helping users with a universal air filter classification system; Thomas C. Ottney; September p.56

Air Flow

Air movement, comfort and ventilation in partitioned work stations; Fred S. Bauman, Randall S. Helm, David Faulkner, Edward A. Arens and William J. Fisk, March p.42

Low temperature air with high IAQ for tropical climates; C. Mike Scofield; March p.52
Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35
Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26
Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fahey; December p.25

Air Handling

Outdoor air: How much is enough?; Michael J. Filardo Jr.; January p.34
1993 Technology Awards; Bank operations center benefits from constant air ventilation system; Sashikant F. Dani; March p.24
Air movement, comfort and ventilation in partitioned work stations; Fred S. Bauman, Randall S. Helm, David Faulkner, Edward A. Arens and William J. Fisk, March p.42
Integrating VAV zone requirements with supply fan operation; Mashuri Warren and Leslie K. Norford; April p.43
Drift eliminators and cooling tower performance; Bryan R. Becker and Larry F. Burdick; June p.28
Avoiding low frequency noise in packaged HVAC equipment; Charles E. Ebbing and Warren E. Blazier Jr.; June p.46
Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70

Air Leakage

Changes in air leakage levels of six Canadian office buildings; with C.Y. Shaw, J.T. Reardon and M.S. Cheung; February p.34
Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fahey; December p.25

Air Quality

Outdoor air: How much is enough?; Michael J. Filardo Jr.; January p.34
1993 HVAC&R Technology Review; Issues and opportunities for the future; Billy R. Manning; January p.S235
1993 HVAC&R Technology Review; Sick buildings: A gift from heaven?; Ulf N. Rengholt; January p.S236
1993 HVAC&R Technology Review; Gas filtration: Progress and problems; Richard D. Rivers; January p.S236
1993 Technology Awards; Indoor air quality and the ASHRAE Technology Awards; Douglas S. Walkinshaw; March p.22
Low temperature air with high IAQ for tropical climates; C. Mike Scofield; March p.52

1993 Technology Awards; New HVAC system reduces operating costs; Ronald R. Lefebvre; April p.20

Particle management for HVAC systems; Thomas C. Ottney; July p.26

Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35

Ventilation, carbon dioxide and *ASHRAE Standard 62-1989*; Andrew K. Persily; July p.40

Standards for design and evaluation of the thermal indoor environment; Bjarne W. Olesen; August p.20

Helping users with a universal air filter classification system; Thomas C. Ottney; September p.56

New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22

Ammonia

1993 HVAC&R Technology Review; The re-emergence of ammonia refrigeration; Robert S. Burdick; January p.S229

Azeotropes

Near-azeotropic refrigerants as alternatives for R-502; Mark B. Shifflett and Akimichi Yokozeki; February p.24

Current and future refrigerants for chillers; Stephen Massien and Randall Demke; May p.62

Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p.42

Compatibility of elastomers with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173

Status and use of the Refrigerant Database; James M. Calm; November p.50

Boiler

1993 HVAC&R Technology Review; Energy conservation opportunities still exist; Richard A. Evans; January p.S229

Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38

How to measure low-pressure steam boiler efficiency; John T. Katrakis and Thomas S. Zawacki; September p.46

New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22

Building Codes

Understanding smoke management and control; David M. Elovitz and Kenneth M. Elovitz; April p.34

Fire dampers: Obsolete or still a good bet?; William A. Schmidt; June p.16

Revised standards for mechanical refrigeration; Lee W. Burgett; August p.31

Building Systems

1993 HVAC&R Technology Review; All building systems must be fully integrated; Donald E. Holte; January p.S232

1993 Technology Awards; Indoor air quality and the ASHRAE Technology Awards; Douglas S. Walkinshaw; March p.22

1993 Technology Awards; Bank operations center benefits from constant air ventilation system; Sashikant F. Dani; March p.24

Electric demand prediction using artificial neural network technology; Gerald L. Gibson and Timothy T. Kraft; March p.60

Fire dampers: Obsolete or still a good bet?; William A. Schmidt; June p.16

Fire and smoke dampers in active HVAC systems; Francis J. McCabe and Richard M. Plettner; June p.20

Particle management for HVAC systems; Thomas C. Ottney; July p.26

Standards for design and evaluation of the thermal indoor environment; Bjarne W. Olesen; August p.20

Renovation of the Watergate 600 Building; Hsing-Chung Yu, John J. Harmon and J. Michael Galway; October p.30

New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22

Calculating lighting and HVAC interactions; Robert A. Rundquist, Karl F. Johnson, and Donald J. Aumann; November p.28

Building operation: Opportunities for improvement?; J. Steven Schliesing, Patrick J. O'Neill, Mark A. Halverson and Michael R. Brambley; November p.38

Building commissioning with DDC systems; David Champagne; December p.20

Carbon Dioxide

Ventilation, carbon dioxide and *ASHRAE Standard 62-1989*; Andrew K. Persily; July p.40

Chillers

Primary cooling systems: A comparative analysis; Laurence V. Wilson and Barry Nugent; January p.19

The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49

R-245ca: A potential far-term alternative for R-11; N.D. Smith, K. Ratanaphruks, M.W. Tufts and A.S. Ng; February p.19

1993 Technology Awards; Chilled water storage system reduces energy costs; Donald P. Fiorino; April p.30

Energy conservation with chilled-water storage; Donald P. Fiorino; May p.22

Alternative refrigerants for R-22 chillers; Mark W. Spatz; May p.50

R-134a: The best alternative for chillers; Chandra Madan; May p.58

The long-term alternative: R-143a in positive pressure chillers; James R. Parsnow; May p.54

Current and future refrigerants for chillers; Stephen Massien and Randall Demke; May p.62

A positive outlook for the future; William E. Dietrich; May p.64

R-123: A balanced selection for low pressure systems; Eugene L. Smithart and James G. Crawford; May p.66

Environmental solutions for today's refrigerant challenges; John P. Ostman; May p.70

Chilled water system optimization; Stephen B. Austin; July p.50

New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22

Purge needs in absorption chillers; J.G. Murray; October p.40

Tube-side fouling in water chiller-flooded evaporators; with S. Imam Haider, Ralph L. Webb and Amanda K. Meitz; October p.59

Chlorofluorocarbons

1993 HVAC&R Technology Review; Refrigeration industry due for traumatic changes; William J. Buck; January p.S229

1993 HVAC&R Technology Review; The re-emergence of ammonia refrigeration; Robert S. Burdick; January p.S229

1993 HVAC&R Technology Review; The CFC crisis: Our opportunities; Richard O. Hunton; January p.S232

Retrofitting large refrigeration systems with R-134a; S. Corr, T.W. Dekleva and A.L. Savage; February p.29

Advanced insulations for refrigerated shipping containers; K. Thomas Feldman Jr.; February p.42

Environmental solutions for today's refrigerant challenges; John P. Ostman; May p.70

Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew A. Lindley and Philip Powell; December p.40

Chlorohydrofluorocarbon

Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew Lindley and Philip Powell; December p.40

Cogeneration

1993 Technology Awards; Hospital's new energy center cuts costs and conserves energy; Evans J. Lizardos; March p.37
1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; Ronald F. Amberger and John DeFrees; April p.24

Cold Climates

HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
Using passive refrigeration to stabilize foundations in cold climates; Edward Yarmak Jr. and Jay A. Farmwald; September p.32

Cold Storage

Advanced insulations for refrigerated shipping containers; K. Thomas Feldman Jr.; February p.42

Combustion

HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38
How to measure low-pressure steam boiler efficiency; John T. Katrakis and Thomas S. Zawacki; September p.46
Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew A. Lindley and Philip Powell; December p.40

Comfort

Air movement, comfort and ventilation in partitioned work stations; Fred S. Bauman, Randall S. Helm, David Faulkner, Edward A. Arens and William J. Fisk; March p.42
Silicon infrared sensors for thermal comfort and control; Charles H. Culp, Brian C. Krafthefer, Michael L. Rhodes and Marilyn A. Listvan; April p.38
Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35
Standards for design and evaluation of the thermal indoor environment; Bjarne W. Olesen; August p.20
Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26

Commercial

Fire dampers: Obsolete or still a good bet?; William A. Schmidt; June p.16
Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35

Commissioning

Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46
Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fairey; December p.25
Building commissioning with DDC systems; David Champagne; December p.20

Compressor

1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; Ronald F. Amberger and John DeFrees; April p.24
R-134a: The best alternative for chillers; Chandra Madan; May p.58

Computers

Graphical tools to help calibrate the DOE-2 simulation program; J.S. Haberl, J.D. Bronson, S.B. Hinchey and D.L. O'Neil; January p.27
Electric demand prediction using artificial neural network technology; Gerald L. Gibson and Timothy T. Kraft; March p. 60
Status and use of the Refrigerant Database; James M. Calm; November p.50
Building commissioning with DDC systems; David Champagne; December p.20

Condensation

Cold air distribution and concerns about condensation; John J. Harmon and Hsing-Chung Yu; May p.34
Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fairey; December p.25

Condensers

Primary cooling systems: A comparative analysis; Laurence V. Wilson and Barry Nugent; January p.19
Chilled water system optimization; Stephen B. Austin; July p.50

Contamination

Testing of chemically treated absorbent air purifiers; Thomas J. Kelly and Devon H. Kinkead; July p.14
Particle management for HVAC systems; Thomas C. Ottney; July p.26

Control

1993 HVAC&R Technology Review; Smoke control and ASHRAE; John H. Klote; January p.S234
1993 HVAC&R Technology Review; The great smoke/fire control challenge; Robert E. Taylor; January p.S237

Another look at traditional control valve sizing practice; Z. John Zhang; February p.38
1993 Technology Awards; Bank operations center benefits from constant air ventilation system; Sashikant F. Dani; March p.24
1993 Technology Awards; System retrofit system provides decentralized heating for mental health facility; Gary R. Gabriel; March p.33
Understanding smoke management and control; David M. Elovitz and Kenneth M. Elovitz; April p.34
Silicon infrared sensors for thermal comfort and control; Charles H. Culp, Brian C. Krafthefer, Michael L. Rhodes and Marilyn A. Listvan; April p.38
Integrating VAV zone requirements with supply fan operation; Mashuri Warren and Leslie K. Norford; April p.43
Controlling HVAC system noise and vibration; Mark E. Schaffer; June p.39
Fire and smoke dampers in active HVAC systems; Francis J. McCabe and Richard M. Plettner; June p.20
New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22
Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70
Building operation: Opportunities for improvement?; J. Steven Schliesing, Patrick J. O'Neill, Mark A. Halverson and Michael R. Brambley; November p.38
Building commissioning with DDC systems; David Champagne; December p.20

Cooling Tower

Drift eliminators and cooling tower performance; Bryan R. Becker and Larry F. Burdick; June p.28
Chilled water system optimization; Stephen B. Austin; July p.50

Dampers

Fire dampers: Obsolete or still a good bet?; William A. Schmidt; June p.16
Fire and smoke dampers in active HVAC systems; Francis J. McCabe and Richard M. Plettner; June p.20
Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70

Diffusion

The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49
Energy conservation with chilled-water storage; Donald P. Fiorino; May p.22

Drift

Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26

Duct

Achieving a quiet rooftop installation;
Robert G. Harold; December p.32

Education

1993 HVAC&R Technology Review; The future of the HVAC&R industry; Michael E. Dillon; January p.S229
1993 HVAC&R Technology Review; Using what we have better; George A. Jackins; January p.S232
1993 HVAC&R Technology Review; New technologies will promote energy efficiency; Prasanna V. Kadaba; January p.S234
1993 HVAC&R Technology Review; The changing role of HVAC&R engineers; Robert M. Suggs; January p.S236
1993 HVAC&R Technology Review; What makes a good engineer?; Willard R. Zahn; January p.S238

Efficiency

The long-term alternative: R-143a in positive pressure chillers; James R. Parsnow; May p.54
Current and future refrigerants for chillers; Stephen Massien and Randall Demke; May p.62

Electric

Graphical tools to help calibrate the DOE-2 simulation program; J.S. Haberl, J.D. Bronson, S.B. Hinchey and D.L. O'Neill; January p.27
Electric demand prediction using artificial neural network technology; Gerald L. Gibson and Timothy T. Kraft; March p.60
Field performance of residential refrigerators; Alan K. Meier; August p.36

Energy

1993 HVAC&R Technology Review; Energy efficiency and future HVAC designs; Robert W. Besant; January p.S228
1993 HVAC&R Technology Review; The CFC crisis: Our opportunities; Richard O. Hunton; January p.S232
1993 HVAC&R Technology Review; New technologies will promote energy efficiency; Prasanna V. Kadaba; January p.S234
1993 Technology Awards; Bank operations center benefits from constant air ventilation system; Sashikant F. Dani; March p.24
Field performance of residential refrigerators; Alan K. Meier; August p.36
Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38

Selecting mechanical systems for laboratory buildings; D. Randall Lacey; November p.44

Energy Calculation

Primary cooling systems: A comparative analysis; Laurence V. Wilson and Barry Nugent; January p.19
Field performance of residential refrigerators; Alan K. Meier; August p.36
Calculating lighting and HVAC interactions; Robert A. Rundquist, Karl F. Johnson, and Donald J. Aumann; November p.28
Building operation: Opportunities for improvement?; J. Steven Schliesing, Patrick J. O'Neill, Mark A. Halverson and Michael R. Brambley; November p.38

Energy Conservation

1993 HVAC&R Technology Review; Energy conservation opportunities still exist; Richard A. Evans; January p.S229
1993 HVAC&R Technology Review; HVAC&R technologies of the future; Gerald R. Guinn; January p.S230
1993 HVAC&R Technology Review; Innovations in the HVAC industry; Robert E. Hopper; January p.S230
1993 HVAC&R Technology Review; All building systems must be fully integrated; Donald E. Holte; January p.S232
1993 HVAC&R Technology Review; Issues and opportunities for the future; Billy R. Manning; January p.S235
1993 HVAC&R Technology Review; GSHPs offer several benefits; Stephen W. Trelease; January p.S238
1993 Technology Awards; Thermal storage HVAC system retrofit provides economical air conditioning; Scott F. Smith; March p.28
1993 Technology Awards; System retrofit provides decentralized heating for mental health facility; Gary R. Gabriel; March p.33
1993 Technology Awards; Hospital's new energy center cuts costs and conserves energy; Evans J. Lizardos; March p.37
1993 Technology Awards; Separate HVAC systems maximize energy efficiency; Jeffrey G. Boldt; April p.16
1993 Technology Awards; New HVAC system reduces operating costs; Ronald R. Lefebvre; April p.20
1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; Ronald F. Amberger and John DeFrees; April p.24
1993 Technology Awards; Chilled water storage system reduces energy costs; Donald P. Fiorino; April p.30

Energy conservation with chilled-water storage; Donald P. Fiorino; May p.22
Field performance of residential refrigerators; Alan K. Meier; August p.36

Environment

1993 HVAC&R Technology Review; The future of the HVAC&R industry; Michael E. Dillon; January p.S229
1993 HVAC&R Technology Review; All building systems must be fully integrated; Donald E. Holte; January p.S232
Environmental solutions for today's refrigerant challenges; John P. Ostman; May p.70
Standards for design and evaluation of the thermal indoor environment; Bjarne W. Olesen; August p.20
Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26

Evaporator

Tube-side fouling in water chiller-flooded evaporators; with S. Imam Haider, Ralph L. Webb and Amanda K. Meitz; October p.59

Extended Surface

Testing of chemically treated adsorbent air purifiers; Thomas J. Kelly and Devon H. Kinkead; July p.14

Fans

1993 HVAC&R Technology Review; Sick buildings: A gift from heaven?; Ulf N. Rengholt; January p.S236
Integrating VAV zone requirements with supply fan operation; Mashuri Warren and Leslie K. Norford; April p.43
Avoiding low frequency noise in packaged HVAC equipment; Charles E. Ebbing and Warren E. Blazier Jr.; June p.46
Renovation of the Watergate 600 Building; Hsing-Chung Yu, John J. Harmon and J. Michael Galway; October p.30
Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70

Fenestration

The benefits of using window shades; W. Ross McCluney and Laney R. Mills; November p.20

Filtration

1993 HVAC&R Technology Review; Gas filtration: Progress and problems; Richard D. Rivers; January p.S236
Testing of chemically treated adsorbent air purifiers; Thomas J. Kelly and Devon H. Kinkead; July p.16
Particle management for HVAC systems; Thomas C. Ottney; July p.26

1993 Editorial Index

Helping users with a universal air filter classification system; Thomas C. Otteny; September p. 56

Fire Safety

1993 HVAC&R Technology Review; The great smoke/fire control challenge; Robert E. Taylor; January p.S237
Fire dampers: Obsolete or still a good bet?; William A. Schmidt; June p.16
Fire and smoke dampers in active HVAC systems; Francis J. McCabe and Richard M. Plettner; June p.20

Freezing

HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
Using passive refrigeration to stabilize foundations in cold climates; Edward Yarmak Jr. and Jay A. Farmwald; September p.32

Frost

HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
Using passive refrigeration to stabilize foundations in cold climates; Edward Yarmak Jr. and Jay A. Farmwald; September p.32

Foundation

Using passive refrigeration to stabilize foundations in cold climates; Edward Yarmak Jr. and Jay A. Farmwald; September p.32

Gas

1993 HVAC&R Technology Review; Gas filtration: Progress and problems; Richard D. Rivers; January p.S236

Glass

The benefits of using window shades; W. Ross McCluney and Laney R. Mills; November p.20

Global Warming

1993 HVAC&R Technology Review; Issues and opportunities for the future; Billy R. Manning; January p.S235
Current and future refrigerants for chillers; Stephen Massien and Randall Demke; May p.62
A positive outlook for the future; William E. Dietrich; May p.64
R-123: A balanced selection for low pressure systems; Eugene L. Smithart and James G. Crawford; May p.66
Environmental solutions for today's refrigerant challenges; John P. Ostman; May p.70

Greenhouse

The benefits of using window shades; W. Ross McCluney and Laney R. Mills; November p.20

Heat Exchangers

Low temperature air with high IAQ for tropical climates; C. Mike Scofield; March p.52
Drift eliminators and cooling tower performance; Bryan R. Becker and Larry F. Burdick; June p.28

Heat Pumps

1993 HVAC&R Technology Review; GSHPs offer several benefits; Stephen W. Trelease; January p.S238
1993 Technology Awards; New HVAC system reduces operating costs; Ronald R. Lefebvre; April p.20

Heat Recovery

1993 HVAC&R Technology Review; Energy efficiency and future HVAC designs; Robert W. Besant; January p.S228
1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; Ronald F. Amberger and John DeFrees; April p.24
Matching equipment size to cooling load; Barry Bloom; October p.50

Heat Transfer

Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26

Heating

The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49
1993 HVAC&R Technology Review; Nuclear HVAC is here to stay; Robert E. Jensen; January p.S234
1993 Technology Awards; System retrofit provides decentralized heating for mental health facility; Gary R. Gabriel; March p.33
HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38
New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22
Calculating lighting and HVAC interactions; Robert A. Rundquist, Karl F. Johnson, and Donald J. Aumann; November p.28

History

The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49
1993 HVAC&R Technology Review; Using what we have better; George A. Jackins; January p.S232
New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22

Hoods

1993 Technology Awards; Separate HVAC systems maximize energy efficiency; Jeffrey G. Boldt; April p.16
Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35
Selecting mechanical systems for laboratory buildings; D. Randall Lacey; November p.44

Hot Water

1993 Technology Awards; System retrofit provides decentralized heating for mental health facility; Gary R. Gabriel; March p.33
1993 Technology Awards; Hospital's new energy center cuts costs and conserves energy; Evans J. Lizardos; March p.37

Human Factors

Silicon infrared sensors for thermal comfort and control; Charles H. Culp, Brian C. Krafthefer, Michael L. Rhodes and Marilyn A. Listvan; April p.38

Humidity

Cold air distribution and concerns about condensation; John J. Harmon and Hsing-Chung Yu; May p.34
HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
Matching equipment size to cooling load; Barry Bloom; October p.50
Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fairey; December p.25

Hydrochlorofluorocarbons

1993 HVAC&R Technology Review; The emergence of ammonia refrigeration; Robert S. Burdick; January p.S229
R-245ca: A potential far-term alternative for R-11; N.D. Smith, K. Ratanaphraks, M.W. Tufts and A.S. Ng; February p.19
Near-azeotropic refrigerants as alternatives for R-502; Mark B. Shiflett and Akimichi Yokozeki; February p.24
The long-term alternatives: R-143a in positive pressure chillers; James R. Parsnow; May p.54

Environmental solutions for today's refrigerant challenges; John P. Ostman; May p.70

Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42

Compatibility of elastomers with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173

Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew A. Lindley and Philip Powell; December p.40

Hydrofluorocarbons

R-245ca: A potential far-term alternative for R-11; N.D. Smith, K. Ratanaphruks, M.W. Tufts and A.S. Ng; February p.19

Near-azeotropic refrigerants as alternatives for R-502; Mark B. Shiflett and Akimichi Yokozeki; February p.24

Retrofitting large refrigeration systems with R-134a; S. Corr, T.W. Dekleva and A.L. Savage; February p.29

Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42

Compatibility of elastomers with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173

Hydronic

Another look at traditional control valve sizing practice; Z. John Zhang; February p.38

Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46

Insulation

Advanced insulations for refrigerated shipping containers; K. Thomas Feldman Jr.; February p.42

Cold air distribution and concerns about condensation; John J. Harmon and Hsing Chung Yu; May p.34

Kitchens

Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35

Laboratory

1993 HVAC&R Technology Review; Energy conservation opportunities still exist; Richard A. Evans; January p.S229

1993 Technology Awards; Separate HVAC systems maximize energy efficiency; Jeffrey G. Boldt; April p.16

Selecting mechanical systems for laboratory buildings; D.Randall Lacey; November p.44

Leakage

Purge needs in absorption chillers; J.G. Murray; October p.40

Lighting

Calculating lighting and HVAC interactions; Robert A. Rundquist, Karl F. Johnson and Donald J. Aumann; November p.28

Load Calculation

Primary cooling systems: A comparative analysis; Laurence V. Wilson and Barry Nugent; January p.19

Graphical tools to help calibrate the DOE-2 simulation program; J.S. Haberl, J.D. Bronson, S.B. Hinchey and D.L. O'Neil; January p.27

Outdoor air: How much is enough?; Michael J. Filardo Jr.; January p.34

Matching equipment size to cooling load; Barry Bloom; October p.50

Calculating lighting and HVAC interactions; Robert A. Rundquist, Karl F. Johnson, and Donald J. Aumann; November p.28

Selecting mechanical systems for laboratory buildings; D.Randall Lacey; November p.44

Low Temperature

Low temperature air with high IAQ for tropical climates; C. Mike Scofield; March p.52

Cold air distribution and concerns about condensation; John J. Harmon and Hsing-Chung Yu; May p.34

Status and use of the Refrigerant Database; James M. Calm; November p.50

Lubricants

R-245ca: A potential far-term alternative for R-11; N.D. Smith, K. Ratanaphruks, M.W. Tufts and A.S. Ng; February p.19

Retrofitting large refrigeration systems with R-134a; S. Corr, T.W. Dekleva and A.L. Savage; February p.29

Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42

Compatibility of elastomers with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173

Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew A. Lindley and Philip Powell; December p.40

Maintenance

Particle management for HVAC systems; Thomas C. Ottney; July p.26

Building operation: Opportunities for improvement?; J. Steven Schliesing, Patrick J. O'Neill, Mark A. Halverson and Michael R. Brambley; November p.38

Measurement

Changes in air leakage levels of six Canadian office buildings; C.Y. Shaw,

J.T. Reardon and M.S. Cheung; February p.34

Ventilation, carbon dioxide and ASHRAE Standard 62-1989; Andrew K. Persily; July p.40

Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38

How to measure low-pressure steam boiler efficiency; John T. Katrakakis and Thomas S. Zawacki; September p.46

Microbiology

Particle management for HVAC systems; Thomas C. Ottney; July p.26

Modeling

1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; Ronald F. Amberger and John DeFrees; April p.24

Chilled water system optimization; Stephen B. Austin; July p.50

Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38

How to measure low-pressure steam boiler efficiency; John T. Katrakakis and Thomas S. Zawacki; September p.46

Moisture

Cold air distribution and concerns about condensation; John J. Harmon and Hsing-Chung Yu; May p.34

Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fairey; December p.25

Motors

Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42

Noise

Controlling HVAC system noise and vibration; Mark E. Schaffer; June p.39

Avoiding low frequency noise in packaged HVAC equipment; Charles E. Ebbing and Warren E. Blazier Jr.; June p.46

Achieving a quiet rooftop installation; Robert G. Harold; December p.32

Nuclear

1993 HVAC&R Technology Review; Nuclear HVAC is here to stay; Robert E. Jensen; January p.S234

Office Buildings

Electric demand prediction using artificial neural network technology; Gerald L. Gibson and Timothy T. Kraft; March p.60

Piping

Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46

Pollution

1993 Technology Awards; Indoor air quality and the ASHRAE Technology Awards; Douglas S. Walkinshaw; March p.22

Pressure

Understanding smoke management and control; David M. Elovitz and Kenneth M. Elovitz; April p.34
Integrating VAV zone requirements with supply fan operation; Mashuri Warren and Leslie K. Norford; April p.43
Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70
Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odum and Phillip W. Fairey; December p.25

Pressure Loss

Drift eliminators and cooling tower performance; Bryan R. Becker and Larry F. Burdick; June p.28
Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46

Pumps

1993 Technology Awards; Chilled water storage system reduces energy costs; Donald P. Fiorino; April p.30
Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46

Purge System

Purge needs in absorption chillers; J.G. Murray; October p.40

Radiant

Silicon infrared sensors for thermal comfort and control; Charles H. Culp, Brian C. Krafthefer, Michael L. Rhodes and Marilyn A. Listvan; April p.38

Radiation

The benefits of using window shades; Laney R. Mills and W. Ross McCluney; November p.20

Rating

Fire and smoke dampers in active HVAC systems; Francis J. McCabe and Richard M. Plettner; June p.20
Helping users with a universal air filter classification system; Thomas C. Otteny; September p. 56

Refrigerants

1993 HVAC&R Technology Review; Refrigeration industry due for traumatic changes; William J. Buck; January p.S228
R-245ca: A potential far-term alternative for R-11; with N.D. Smith, K. Ratanaphruks, M.W. Tufts and A.S. Ng; February p.19
Near-azeotropic refrigerants as alternatives for R-502; Mark B. Shiflett and Akimichi Yokozeki; February p.24
Retrofitting large refrigeration systems with R-134a; S. Corr, T.W. Dekleva and A.L. Savage; February p.29
Alternative refrigerants for R-22 chillers; Mark W. Spatz; May p.50
R-134a: The best alternative for chillers; Chandra Madan; May p.58
The long-term alternative: R-143a in positive pressure chillers; James R. Parsnow; May p.54
Current and future refrigerants for chillers; Stephen Massien and Randall Demke; May p.62
A positive outlook for the future; William E. Dietrich; May p.64
R-123: A balanced selection for low pressure systems; Eugene L. Smithart and James G. Crawford; May p.66
Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42
Compatibility of elastomer-based materials with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173
Purge needs in absorption chillers; J.G. Murray; October p.40
Status and use of the Refrigerant Database; James M. Calm; November p.50
Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew A. Lindley and Philip Powell; December p.25

Refrigerant/Oil

R-134a: The best alternative for chillers; Chandra Madan; May p.58
Revised standards for mechanical refrigeration; Lee W. Burgett; August p.31
Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42
Compatibility of elastomer-based materials with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173

Refrigeration

The 1920s: The first realization of public air conditioning; Bernard A. Nagen-gast; January p.S49
1993 HVAC&R Technology Review; Refrigeration industry due for traumatic changes; William J. Buck; January p.S228
1993 HVAC&R Technology Review; The re-emergence of ammonia refrigeration; Robert S. Burdick; January p.S229
Near-azeotropic refrigerants as alternatives for R-502; Mark B. Shiflett and Akimichi Yokozeki; February p.24
Retrofitting large refrigeration systems with R-134a; S. Corr, T.W. Dekleva and A.L. Savage; February p.29
Advanced insulations for refrigerated shipping containers; K. Thomas Feldman Jr.; February p.42
1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; Ronald F. Amberger and John DeFrees; April p.24
Revised standards for mechanical refrigeration; Lee W. Burgett; August p.31
Using passive refrigeration to stabilize foundations in cold climates; Edward Yarmak Jr. and Jay A. Farmwald; September p.32
Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70

Refrigerators

Field performance of residential refrigerators; Alan K. Meier; August p.36

Research

Controlling HVAC system noise and vibration; Mark E. Schaffer; June p.39
Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42
Compatibility of elastomer-based materials with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173
Status and use of the Refrigerant Database; James M. Calm; November p.50

Research Notes

Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42
Compatibility of elastomer-based materials with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173
Status and use of the Refrigerant Database; James M. Calm; November p.50

Research Report

- Air movement, comfort and ventilation in partitioned work stations; Fred S. Bauman, Randall S. Helm, David Faulkner, Edward A. Arens and William J. Fisk, March p.42
- Drift eliminators and cooling tower performance; Bryan R. Becker and Larry F. Burdick; June p.28
- Compatibility of elastomers with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173
- Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38
- Tube-side fouling in water chiller-flooded evaporators; with S. Imam Haider, Ralph L. Webb and Amanda K. Meitz; October p.59

Residential

- Field performance of residential refrigerators; Alan K. Meier; August p.36
- How to measure low-pressure steam boiler efficiency; John T. Katrakis and Thomas S. Zawacki; September p.46

Roof

- Achieving a quiet rooftop installation; Robert G. Harold; December p.32

Safety

- 1993 HVAC&R Technology Review; The re-emergence of ammonia refrigeration; Robert S. Burdick; January p.S229
- Understanding smoke management and control; David M. Elovitz and Kenneth M. Elovitz; April p.34
- R-123: A balanced selection for low pressure systems; Eugene L. Smithart and James G. Crawford; May p.66
- Fire dampers: Obsolete or still a good bet?; William A. Schmidt; June p.16

Seals

- Compatibility of elastomers with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173

Sensors

- Silicon infrared sensors for thermal comfort and control; Charles H. Culp, Brian C. Krafthefer, Michael L. Rhodes and Marilyn A. Listvan; April p.38

Sick Buildings

- 1993 HVAC&R Technology Review; Sick buildings: A gift from heaven?; Ulf N. Rengholt; January p.S236

Shading

- The benefits of using window shades; Laney R. Mills and W. Ross McCluney; November p.20

Sizing

- Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46

Smoke Control

- 1993 HVAC&R Technology Review; Smoke control and ASHRAE; John H. Klote; January p.S234
- 1993 HVAC&R Technology Review; The great smoke/fire control challenge; Robert E. Taylor; January p.S237
- Understanding smoke management and control; David M. Elovitz and Kenneth M. Elovitz; April p.34
- Fire dampers: Obsolete or still a good bet?; William A. Schmidt; June p.16
- Fire and smoke dampers in active HVAC systems; Francis J. McCabe and Richard M. Plettner; June p.20

Snow

- HVAC design considerations for cold climates; Richard S. Armstrong; September p.22

Solar

- HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
- The benefits of using window shades; Laney R. Mills and W. Ross McCluney; November p.20

Space Heating

- Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38

Standards

- 1993 HVAC&R Technology Review; Issues and opportunities for the future; Billy R. Manning; January p.S235
- 1993 Technology Awards; Indoor air quality and the ASHRAE Technology Awards; Douglas S. Walkinshaw; March p.22
- 1993 Technology Awards; Bank operations center benefits from constant air ventilation system; Sashikant F. Dani; March p.24
- Ventilation, carbon dioxide and ASHRAE Standard 62-1989; Andrew K. Persily; July p.40
- Standards for design and evaluation of the thermal indoor environment; Bjarne W. Olesen; August p.20

- Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26
- Revised standards for mechanical refrigeration; Lee W. Burgett; August p.31
- Helping users with a universal air filter classification system; Thomas C. Ottney; September p.56
- Renovation of the Watergate 600 Building; Hsing-Chung Yu, John J. Harmon and J. Michael Galway; October p.30
- Status and use of the Refrigerant Database; James M. Calm; November p.50
- Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew A. Lindley and Philip Powell; December p.40

Steam

- 1993 Technology Awards; Hospital's new energy center cuts costs and conserves energy; Evans J. Lizardos; March p.37
- How to measure low-pressure steam boiler efficiency; John T. Katrakis and Thomas S. Zawacki; September p.46

Systems, Building

- Understanding smoke management and control; David M. Elovitz and Kenneth M. Elovitz; April p.34

Technology Awards

- 1993 Technology Awards; Indoor air quality and the ASHRAE Technology Awards; Douglas S. Walkinshaw; March p.22
- 1993 Technology Awards; Bank operations center benefits from constant air ventilation system; Sashikant F. Dani; March p.24
- 1993 Technology Awards; Thermal storage HVAC system retrofit provides economical air conditioning; Scott F. Smith; March p.28
- 1993 Technology Awards; System retrofit provides decentralized heating for mental health facility; Gary R. Gabriel; March p.33
- 1993 Technology Awards; Hospital's new energy center cuts costs and conserves energy; Evans J. Lizardos; March p.37
- 1993 Technology Awards; Separate HVAC systems maximize energy efficiency; Jeffrey G. Boldt; April p.16
- 1993 Technology Awards; New HVAC system reduces operating costs; Ronald R. Lefebvre; April p.20
- 1993 Technology Awards; Retrofit cogeneration system increases refrigeration capacity; Ronald F. Amberger and John DeFrees; April p.24
- 1993 Technology Awards; Chilled water storage system reduces energy costs; Donald P. Fiorino; April p.30

Testing

- Changes in air leakage levels of six Canadian office buildings; C.Y. Shaw, J.T. Reardon and M.S. Cheung; February p.34
- Testing of chemically treated adsorbent air purifiers; Thomas J. Kelly and Devon H. Kinkead; July p.16
- Ventilation, carbon dioxide and *ASHRAE Standard 62-1989*; Andrew K. Persily; July p.40
- Compatibility of refrigerants and lubricants with motor materials; Robert Doerr and Stephen Kujak; August p. 42
- Compatibility of elastomer-based materials with refrigerant/lubricant mixtures; Gary R. Hamed and Robert H. Seiple; August p.173
- Measuring seasonal efficiency of space heating boilers; Russell W. Landry, Douglas E. Maddox, Mary S. Lobenstein and David L. Bohac; September p.38
- How to measure low-pressure steam boiler efficiency; John T. Katrakis and Thomas S. Zawacki; September p.46
- Building commissioning with DDC systems; David Champagne; December p.20
- Flammability and reactivity of select HFCs and mixtures; Thomas Dekleva, Andrew A. Lindley and Philip Powell; December p.40

Thermal Response

- Silicon infrared sensors for thermal comfort and control; Charles H. Culp, Brian C. Krafthefer, Michael L. Rhodes and Marilyn A. Listvan; April p.38
- Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35
- Standards for design and evaluation of the thermal indoor environment; Bjarne W. Olesen; August p.20
- Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26
- Using passive refrigeration to stabilize foundations in cold climates; Edward Yarmak Jr. and Jay A. Farmwald; September p.32

Thermal Storage

- 1993 Technology Awards; Bank operations center benefits from constant air ventilation system; Sashikant F. Dani; March p.24
- 1993 Technology Awards; Thermal storage HVAC system retrofit provides economical air conditioning; Scott F. Smith; March p.28
- Electric demand prediction using artificial neural network technology; with Gerald L. Gibson and Timothy T. Kraft; March p. 60

- 1993 Technology Awards; Chilled water storage system reduces energy costs; Donald P. Fiorino; April p.30
- Energy conservation with chilled-water storage; Donald P. Fiorino; May p.22
- Renovation of the Watergate 600 Building; Hsing-Chung Yu, John J. Harmon and J. Michael Galway; October p.30

Thermodynamic

- Alternative refrigerants for R-22 chillers; Mark W. Spatz; May p.50
- Current and future refrigerants for chillers; Stephen Massien and Randall Demke; May p.62

Transport

- Alternative refrigerants for R-22 chillers; Mark W. Spatz; May p.50

Tube

- Tube-side fouling in water chiller-flooded evaporators; with S. Imam Haider, Ralph L. Webb and Amanda K. Meitz; October p.59

Tunnel

- Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70

Valves

- Another look at traditional control valve sizing practice; Z. John Zhang; February p.38
- Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46

Variable Volume

- Outdoor air: How much is enough?; Michael J. Filardo Jr.; January p.34
- Avoiding low frequency noise in packaged HVAC equipment; Charles E. Ebbing and Warren E. Blazier Jr.; June p.46
- Designing and commissioning variable flow hydronic systems; Gil Avery; July p.46

Ventilation

- 1993 HVAC&R Technology Review; Nuclear HVAC is here to stay; Robert E. Jensen; January p.S234
- 1993 HVAC&R Technology Review; Sick buildings: A gift from heaven?; Ulf N. Rengholt; January p.S236
- 1993 Technology Awards; Indoor air quality and the ASHRAE Technology Awards; Douglas S. Walkinshaw; March p.22
- 1993 Technology Awards; Thermal storage HVAC system retrofit provides economical air conditioning; Scott F. Smith; March p.28

- Air movement, comfort and ventilation in partitioned work stations; Fred S. Bauman, Randall S. Helm, David Faulkner, Edward A. Arens and William J. Fisk; March p.42
- 1993 Technology Awards; New HVAC system reduces operating costs; Ronald R. Lefebvre; April p.20
- Thermal comfort and ventilation effectiveness in commercial kitchens; Jorma S. Pekkinen; July p.35
- Ventilation, carbon dioxide and *ASHRAE Standard 62-1989*; Andrew K. Persily; July p.40
- Air movement and thermal comfort; Marc E. Fountain and Edward A. Arens; August p.26
- Revised standards for mechanical refrigeration; Lee W. Burgett; August p.31
- HVAC design considerations for cold climates; Richard S. Armstrong; September p.22
- Renovation of the Watergate 600 Building; Hsing-Chung Yu, John J. Harmon and J. Michael Galway; October p.30
- New HVAC system blends past and present in historic Ohio Statehouse; Terence J. Sullivan and Ned W. Goodburn; October p.22
- Ventilating the English Channel Tunnel; Terence M. Dodge; October p.70
- Calculating lighting and HVAC interactions; Robert A. Rundquist, Karl F. Johnson and Donald J. Aumann; November p.28
- Selecting mechanical systems for laboratory buildings; D.Randall Lacey; November p.44
- Why HVAC commissioning procedures do not work in humid climates; George H. DuBose, J. David Odom and Phillip W. Fairey; December p.25

Vibration

- Controlling HVAC system noise and vibration; Mark E. Schaffer; June p.39
- Avoiding low frequency noise in packaged HVAC equipment; Charles E. Ebbing and Warren E. Blazier Jr.; June p.46
- Achieving a quiet rooftop installation; Robert G. Harold; December p.32

Water Treatment

- Primary cooling systems: A comparative analysis; Laurence V. Wilson and Barry Nugent; January p.19
- Drift eliminators and cooling tower performance; Bryan R. Becker and Larry F. Burdick; June p.28

Zeotropic

- A positive outlook for the future; William E. Dietrich; May p.64
